

# Triad of Life

After traumatic injuries, patients face the "Triad of Death"—Hypothermia, Acidosis, and Coagulopathy. This cycle can quickly lead to fatal outcomes if not managed effectively. That's why Delta Development Team is proud to partner with QinFlow and LifeFlow to combat these life-threatening conditions.

**DELTA**  
DEVELOPMENT TEAM

**Portable blood storage & tracking**

**LifeFlow**  
Rapid infusion

**QinFL<sup>W</sup>**  
High-performance warming

**Delta Development Team**  
One complete solution for transportable blood storage and monitoring in prehospital emergency care, providing accountability and traceability

**QinFlow**  
Reliable blood warming solutions that help prevent hypothermia, ensuring blood reaches the patient at the right temperature

**LifeFlow**  
An easy-to-use portable handheld device that can deliver a unit of blood in two minutes to critically ill patients in urgent need of rapid blood or fluid administration
