
How to Print & Assemble Your APRU Vehicle Mount Template

What You'll Need

- A printer
- Scissors or a craft knife
- Tape

Step 1 — Print the Template

Open the PDF and print all 3 pages using the following settings:

- **Paper size:** Letter (8.5" × 11")
- **Scale:** 100% (actual size) — *do not* use "Fit to Page" or "Shrink to Fit"
- **Margins:** None (set to 0 on all sides). *If your printer does not have a margin setting, enable borderless printing instead.*
- **Borderless Printing:** This setting is typically found under Printer Properties > Page Setup.
- **Orientation:** Match the orientation shown in the PDF

Printing at the wrong scale will cause the template to be inaccurate.

Step 2 — Arrange the Pages

Lay all 3 pages on a flat surface, arranging them side by side from left to right in order:
P. 1 > P. 2 > P. 3.

Step 3 — Align & Tape

Match the alignment circles printed along the edges where the pages meet. Once aligned, tape the pages together firmly.

Step 4 — Cut Out the Template *(if needed)*

If your installation area requires it, carefully cut along the outlined edges using scissors or a craft knife.

Step 5 — Test the Fit

Place the assembled template in your vehicle to check the fitment for the APRU Vehicle Mount.

Step 6 — Questions?

If you have any questions about fitment or compatibility, please contact your sales representative for assistance.
